

Bax protein expression was determined in 21-day old mouse brain tissue by Simple Western 12-230kD matrix using antibody against Bax (AF820, Lot#BOZ0511041). A strong band around 25kDa was observed and used for quantitation.

Different Bax antibody concentrations were tested. Lane 1: Bax antibody dilution 1/10, lane 2: Bax antibody dilution 1/50 and lane 3: Bax antibody dilution 1/200.
